

I don't want New Jersey's "No Not Call" law to be overturned. I believe that people should have a right to not be bothered by unsolicited calls if they don't want them. Besides, I think these laws do telemarketing businesses a favor by eliminating the people who don't want these calls since these people are unlikely to buy goods or services from a telemarketer. I know that I would not in principle ever buy anything from a telemarketer so why should they waste their time and mine by calling me.

I think the laws should even go further; I think that there should be a "Do Call" list that people could sign up to receive telemarketing calls, otherwise all telemarketing be eliminated.
